

# Mobile Camera System

## A Multi-Camera System for Safer Operation of Any Elgin Sweeper

Elgin® Sweeper introduces the Elgin Mobile Camera system, which provides the operator with expanded visibility to monitor the main and side broom sweeping performance as well as enhanced visibility while backing up and maneuvering the street sweeper.

In 2008, Elgin Sweeper began installing rear-view cameras on all of its street sweepers as standard equipment, but for additional visibility, we are now offering the optional side Mirror Camera kit. Older Elgin model sweepers can have their visibility enhanced with the installation of the entire Elgin Mobile Camera system which is now available as a retro-fit kit. For more information or detailed specifications on either camera contact your local Elgin Dealer.

### Camera Features:

- High-resolution Sony CCD cameras for outstanding image quality
- 5.6 inch color TFT-LCD monitors available
- Multiple camera mounting options available
- Automatic reverse or turn signal camera activation
- Most cameras have infrared LEDs for night vision and a built-in microphone for enhanced driver feedback
- Wide 150-degree viewing angle on CAMCCD-FLSHNTSC and 110-degree viewing on all other cameras
- Multiple camera cable lengths available: 16.5 feet, 33 feet, 49 feet, and 65.5 feet
- Multi-voltage capability (12/24 VDC)
- Two-year limited warranty
